Objective

Four-year Information Technology student interested in Java backend and full-stack web development. Experienced in building academic projects using Spring Boot, ReactJS, MySQL, RESTful APIs, and JWT authentication. Seeking an internship opportunity to improve backend development skills and contribute to real-world software projects.

Education

Posts and Telecommunications Institute of Technology

Information Technology

Expected Graduation: 2028

GPA: 3.60/4.00

Technical Skills

Backend: Java, Spring Boot, Spring MVC, Spring Data JPA, RESTful API, JWT, MVC Architecture

Frontend: ReactJS, Vite, React Router, HTML, CSS, JavaScript

Database: MySQL, SQL Server, Database Design, ERD

Tools: Git, GitHub, Postman, NetBeans, VS Code

Projects

Bookstore Web Application | [Backend](#) | [Frontend](#)

Full-stack Developer - Team size: 4 members

- Developed staff support and chat features using Spring Boot, ReactJS, MySQL, and Firebase.
- Built RESTful APIs for support conversations, messages, tags, unread status, and role-based access control.
- Updated the staff chat interface, role-based navigation, and conversation handling on the frontend.

Soundbook Social Network Web | [Github](#)

Full-stack Developer - Team size: 3 members

- Developed authentication and authorization features, including login, register, Google login, JWT handling, and token blacklist logout.
- Implemented route protection, role-based navigation, and session management for secure user access.
- Built Taste DNA recommendation logic based on user preference analysis and match score calculation.

Certifications

- Certificate in Algorithm Applications – Samsung & PTIT
- English : TOEIC – 765/990
- NVIDIA Fundamentals of Deep Learning
- Student of 5 Merits
- Third Prize of PTIT Young E-Business 2026

Interests

Music, movies, badminton, football, and technology.
